... Energy Independence and Global Warming puts it. Global climate change presents one of the gravest threats, not only to our planet's health, but also to the United States' economy, national security and public health. Scientists warn that we may be approaching a tipping point, after which it will become increasingly difficult, or perhaps impossible, to halt global warming and its catastrophic effects. ...

View Page 44 - chapter 4

..., with nearly all the warming coming after 1970, according to the U.S. Global Change Research Program. "Over the past 30 years, temperatures have risen faster in winter than in any other season, with average winter temperatures in the Midwest and northern Great Plains increasing more than 7 degrees F," the Global Change Research Program reports. Some of the fastest warming on Earth is occurring ...

... to solve **global warming** is deep and broad, and I have learned a great deal from those who have added their voices to this fight. Their experience informs these pages, yet I would like to single out a few whose expertise and inspiration made this book possible. John Adams, the founder of the Natural Resources Defense Council, had an early vision on the critical nature of **global warming** that propelled...
